

KEYSTONE INSTITUTE INDIA

*An Educational Institute on
Disability, Community, and Innovation*

*“Every life is a story like
a thread that interweaves
with myriads of others
to form the tapestry of
humanity.”*

– Anonymous

Keystone Institute India is designed to improve the lives of people with disability across India, and to fuel a change movement on a national level which will work toward a more inclusive, just Indian society where all are valued and all belong.

Our work will serve as a catalyst for the development of a service system in India which better safeguards vulnerable people, establishes thinking which works towards full citizenship and full lives, respects the voices and perspectives of people with disability and their families, and facilitates India moving toward a society where all have possibilities and potential, and all matter.

We seek partners and collaborators who wish to work together towards assisting people with developmental and psychosocial disabilities to join a movement of change which provides opportunities for people to experience home, friends, family, work, and presence in their communities. We provide extensive consultation and education around developing responsive, effective and inclusive support to help move towards belonging, acceptance and a rich community life.

- **We develop and prepare** emerging leaders for the work of community development, design on inclusive support, and move away from segregation and towards integration.
- **We offer intensive workshops and presentations**, provide access to international leadership in promising practices and ideas, and offer ongoing consultation and guidance on implementation strategies.
- **We provide a network of connections** with organizations and people across India and internationally doing promising work in the disability sector.
- **We help fuel and focus** those who wish to engage in the struggle to assist people with disabilities to take their place in Indian society.
